

Dry, Edible Bean Screener The Bean Screening Solution

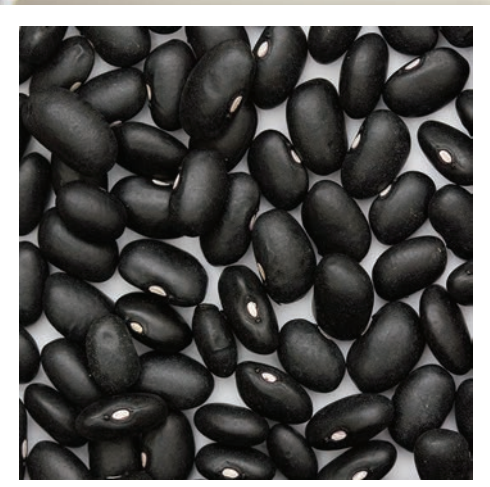

The Gentle Roll™ is ideal for screening dry, edible beans, because of its gentle product handling and high screening efficiency. Unlike other screeners that shake or vibrate, the Gentle Roll™ greatly reduces bean damage because of its rotary-drum system.

- Non-vibrating screening technology provides gentle product handling and reduces seed coat breaks.
- Easy to install inside, outside, or on top of a building or structure. There are no adjustments necessary after installation.
- Designed to be mounted on a level, horizontal plane.
- Minimal to maintain and built to run continuously.
- Easy to access the screens for quick and simple inspection and replacement.
- Fully enclosed to provide excellent dust control and weather protection.
- Specifically designed for the individual customer's needs.

Does your company have a unique product?

Send us a sample and we will test it for FREE in our lab to determine the best configuration for screening efficiency.

Dry, Edible Bean Screener

The Only Screener to Gently Screen Dry, Edible Beans

Screen configurations, ranging from one to five, are available for sifting and scalping. Typically, one to three screens are used to remove fine product. Two additional screens separate the large foreign material from the good product and discharges it at the end of the machine.

Gentle Roll Options:

- Combined or custom discharge hoppers to reduce spouting /conveying needs
- Rotary brushes installed on the outside of the screen(s) to prevent screen blinding
- Rubber lined inlet and discharge hoppers to prevent bean damage
- Internal let-down ladders available

Available Capacities Example:

	Bu/Hr	Tons/Hr
1 Drum	1,500	43
2 Drums	3,000	86
4 Drums	6,000	171
6 Drums	9,000	256
8 Drums	12,000	324
10 Drums	15,000	428

The above chart is based on dry, good flowing product, with a bulk density of 45lbs/ft³ or 720 kg/m³.

You can gain a competitive edge in the bean industry by making your product quality stand out. The time-proven reliability and quality of the Gentle Roll™ make it the perfect solution for all your bean screening needs.
