

Gentle Roll™

Mobile Grain Screener The Grain Screening Solution

The Gentle Roll™ mobile screener has all of the qualities and options of the standard Gentle Roll™ screener, but its mobility allows for use at multiple locations. The Gentle Roll™ mobile screener is most commonly used to separate mixed grains, but can be used to clean grain as well.

Unlike other screeners, the Gentle Roll™ does not shake. Instead, grain gently flows through a non-vibrating, rotary system. This gentle rolling technique produces a higher quality product by reducing potential product damage.

The non-vibrating Gentle Roll™ is fully enclosed to provide dust control and weather proofing, built to run continuously, and uses only the highest quality materials.

You can increase your overall grain quality, while reducing maintenance costs with the Gentle Roll™.

Does your company have a unique product?

Send us a sample and we will test it for FREE in our lab to determine the best configuration for screening efficiency.

Mobile Grain Screener

The Only Mobile Screener to Efficiently Separate Grains

The Gentle Roll™ mobile screener is custom built to fit your specific needs. It is mounted to a flatbed trailer and easily transports from one location to the next.

The Gentle Roll™ mobile screener is minimal to maintain. Inspecting and changing a Gentle Roll™ screen is quick and easy and can be completed by one person in a matter of minutes.

Gentle Roll™ Options:

- Screw/Drag Conveyor attached under hoppers to reclaim product
- Sidewinder Belt Drag Conveyor attached under hoppers with valve assembly

Available Capacities Example:

	Bu/Hr	Tons/Hr
Sifting or Scalping	Up to 1,500	Up to 43
Separating Mixed Grains	Between 800 - 1,500	Between 23 - 43

The above chart is based on dry, good flowing product, with a bulk density of 45lbs/ft³ or 720 kg/m³.

You can gain a competitive edge in the grain industry by making your product quality stand out. The time-proven reliability and quality of the Gentle Roll™ make it the perfect solution for all your grain screening needs.
